- In synthetic exercise 01, I checked 11 monthly records and prepared 3 traceable review notes for the fictional Harbor team. My responsibility was limited to checking the supplied records and documenting discrepancies; the team made the final decision. No customer adoption, revenue or independent business outcome was measured in this classroom exercise.
- In synthetic exercise 02, I checked 12 monthly records and prepared 4 traceable review notes for the fictional Harbor team. My responsibility was limited to checking the supplied records and documenting discrepancies; the team made the final decision. No customer adoption, revenue or independent business outcome was measured in this classroom exercise.
- In synthetic exercise 03, I checked 13 monthly records and prepared 5 traceable review notes for the fictional Harbor team. My responsibility was limited to checking the supplied records and documenting discrepancies; the team made the final decision. No customer adoption, revenue or independent business outcome was measured in this classroom exercise.
- In synthetic exercise 04, I checked 14 monthly records and prepared 6 traceable review notes for the fictional Harbor team. My responsibility was limited to checking the supplied records and documenting discrepancies; the team made the final decision. No customer adoption, revenue or independent business outcome was measured in this classroom exercise.
- In synthetic exercise 05, I checked 15 monthly records and prepared 7 traceable review notes for the fictional Harbor team. My responsibility was limited to checking the supplied records and documenting discrepancies; the team made the final decision. No customer adoption, revenue or independent business outcome was measured in this classroom exercise.
- In synthetic exercise 06, I checked 16 monthly records and prepared 8 traceable review notes for the fictional Harbor team. My responsibility was limited to checking the supplied records and documenting discrepancies; the team made the final decision. No customer adoption, revenue or independent business outcome was measured in this classroom exercise.
- In synthetic exercise 07, I checked 17 monthly records and prepared 9 traceable review notes for the fictional Harbor team. My responsibility was limited to checking the supplied records and documenting discrepancies; the team made the final decision. No customer adoption, revenue or independent business outcome was measured in this classroom exercise.
- In synthetic exercise 08, I checked 18 monthly records and prepared 10 traceable review notes for the fictional Harbor team. My responsibility was limited to checking the supplied records and documenting discrepancies; the team made the final decision. No customer adoption, revenue or independent business outcome was measured in this classroom exercise.

Internships

- In synthetic exercise 09, I checked 19 monthly records and prepared 11 traceable review notes for the fictional Harbor team. My responsibility was limited to checking the supplied records and documenting discrepancies; the team made the final decision. No customer adoption, revenue or independent business outcome was measured in this classroom exercise.
- In synthetic exercise 10, I checked 20 monthly records and prepared 12 traceable review notes for the fictional Harbor team. My responsibility was limited to checking the supplied records and documenting discrepancies; the team made the final decision. No customer adoption, revenue or independent business outcome was measured in this classroom exercise.
- In synthetic exercise 11, I checked 21 monthly records and prepared 13 traceable review notes for the fictional Harbor team. My responsibility was limited to checking the supplied records and documenting discrepancies; the team made the final decision. No customer adoption, revenue or independent business outcome was measured in this classroom exercise.
- In synthetic exercise 12, I checked 22 monthly records and prepared 14 traceable review notes for the fictional Harbor team. My responsibility was limited to checking the supplied records and documenting discrepancies; the team made the final decision. No customer adoption, revenue or independent business outcome was measured in this classroom exercise.
- In synthetic exercise 13, I checked 23 monthly records and prepared 15 traceable review notes for the fictional Harbor team. My responsibility was limited to checking the supplied records and documenting discrepancies; the team made the final decision. No customer adoption, revenue or independent business outcome was measured in this classroom exercise.
- In synthetic exercise 14, I checked 24 monthly records and prepared 16 traceable review notes for the fictional Harbor team. My responsibility was limited to checking the supplied records and documenting discrepancies; the team made the final decision. No customer adoption, revenue or independent business outcome was measured in this classroom exercise.
- In synthetic exercise 15, I checked 25 monthly records and prepared 17 traceable review notes for the fictional Harbor team. My responsibility was limited to checking the supplied records and documenting discrepancies; the team made the final decision. No customer adoption, revenue or independent business outcome was measured in this classroom exercise.
- In synthetic exercise 16, I checked 26 monthly records and prepared 18 traceable review notes for the fictional Harbor team. My responsibility was limited to checking the supplied records and documenting discrepancies; the team made the final decision. No customer adoption, revenue or independent business outcome was measured in this classroom exercise.

Projects

- In synthetic exercise 17, I checked 27 monthly records and prepared 19 traceable review notes for the fictional Harbor team. My responsibility was limited to checking the supplied records and documenting discrepancies; the team made the final decision. No customer adoption, revenue or independent business outcome was measured in this classroom exercise.

- In synthetic exercise 18, I checked 28 monthly records and prepared 20 traceable review notes for the fictional Harbor team. My responsibility was limited to checking the supplied records and documenting discrepancies; the team made the final decision. No customer adoption, revenue or independent business outcome was measured in this classroom exercise.
- In synthetic exercise 19, I checked 29 monthly records and prepared 21 traceable review notes for the fictional Harbor team. My responsibility was limited to checking the supplied records and documenting discrepancies; the team made the final decision. No customer adoption, revenue or independent business outcome was measured in this classroom exercise.
- In synthetic exercise 20, I checked 30 monthly records and prepared 22 traceable review notes for the fictional Harbor team. My responsibility was limited to checking the supplied records and documenting discrepancies; the team made the final decision. No customer adoption, revenue or independent business outcome was measured in this classroom exercise.
- In synthetic exercise 21, I checked 31 monthly records and prepared 23 traceable review notes for the fictional Harbor team. My responsibility was limited to checking the supplied records and documenting discrepancies; the team made the final decision. No customer adoption, revenue or independent business outcome was measured in this classroom exercise.
- In synthetic exercise 22, I checked 32 monthly records and prepared 24 traceable review notes for the fictional Harbor team. My responsibility was limited to checking the supplied records and documenting discrepancies; the team made the final decision. No customer adoption, revenue or independent business outcome was measured in this classroom exercise.
- In synthetic exercise 23, I checked 33 monthly records and prepared 25 traceable review notes for the fictional Harbor team. My responsibility was limited to checking the supplied records and documenting discrepancies; the team made the final decision. No customer adoption, revenue or independent business outcome was measured in this classroom exercise.
- In synthetic exercise 24, I checked 34 monthly records and prepared 26 traceable review notes for the fictional Harbor team. My responsibility was limited to checking the supplied records and documenting discrepancies; the team made the final decision. No customer adoption, revenue or independent business outcome was measured in this classroom exercise.

Education

- In synthetic exercise 25, I checked 35 monthly records and prepared 27 traceable review notes for the fictional Harbor team. My responsibility was limited to checking the supplied records and documenting discrepancies; the team made the final decision. No customer adoption, revenue or independent business outcome was measured in this classroom exercise.
- In synthetic exercise 26, I checked 36 monthly records and prepared 28 traceable review notes for the fictional Harbor team. My responsibility was limited to checking the supplied records and documenting discrepancies; the team made the final decision. No customer adoption, revenue or independent business outcome was measured in this classroom exercise.
- In synthetic exercise 27, I checked 37 monthly records and prepared 29 traceable review notes for the fictional Harbor team. My responsibility was limited to checking the supplied records and documenting

discrepancies; the team made the final decision. No customer adoption, revenue or independent business outcome was measured in this classroom exercise.

- In synthetic exercise 28, I checked 38 monthly records and prepared 30 traceable review notes for the fictional Harbor team. My responsibility was limited to checking the supplied records and documenting discrepancies; the team made the final decision. No customer adoption, revenue or independent business outcome was measured in this classroom exercise.
- In synthetic exercise 29, I checked 39 monthly records and prepared 31 traceable review notes for the fictional Harbor team. My responsibility was limited to checking the supplied records and documenting discrepancies; the team made the final decision. No customer adoption, revenue or independent business outcome was measured in this classroom exercise.
- In synthetic exercise 30, I checked 40 monthly records and prepared 32 traceable review notes for the fictional Harbor team. My responsibility was limited to checking the supplied records and documenting discrepancies; the team made the final decision. No customer adoption, revenue or independent business outcome was measured in this classroom exercise.
- In synthetic exercise 31, I checked 41 monthly records and prepared 33 traceable review notes for the fictional Harbor team. My responsibility was limited to checking the supplied records and documenting discrepancies; the team made the final decision. No customer adoption, revenue or independent business outcome was measured in this classroom exercise.
- In synthetic exercise 32, I checked 42 monthly records and prepared 34 traceable review notes for the fictional Harbor team. My responsibility was limited to checking the supplied records and documenting discrepancies; the team made the final decision. No customer adoption, revenue or independent business outcome was measured in this classroom exercise.

Skills

- In synthetic exercise 33, I checked 43 monthly records and prepared 35 traceable review notes for the fictional Harbor team. My responsibility was limited to checking the supplied records and documenting discrepancies; the team made the final decision. No customer adoption, revenue or independent business outcome was measured in this classroom exercise.
- In synthetic exercise 34, I checked 44 monthly records and prepared 36 traceable review notes for the fictional Harbor team. My responsibility was limited to checking the supplied records and documenting discrepancies; the team made the final decision. No customer adoption, revenue or independent business outcome was measured in this classroom exercise.
- In synthetic exercise 35, I checked 45 monthly records and prepared 37 traceable review notes for the fictional Harbor team. My responsibility was limited to checking the supplied records and documenting discrepancies; the team made the final decision. No customer adoption, revenue or independent business outcome was measured in this classroom exercise.
- In synthetic exercise 36, I checked 46 monthly records and prepared 38 traceable review notes for the fictional Harbor team. My responsibility was limited to checking the supplied records and documenting discrepancies; the team made the final decision. No customer adoption, revenue or independent business outcome was measured in this classroom exercise.

- In synthetic exercise 37, I checked 47 monthly records and prepared 39 traceable review notes for the fictional Harbor team. My responsibility was limited to checking the supplied records and documenting discrepancies; the team made the final decision. No customer adoption, revenue or independent business outcome was measured in this classroom exercise.
- In synthetic exercise 38, I checked 48 monthly records and prepared 40 traceable review notes for the fictional Harbor team. My responsibility was limited to checking the supplied records and documenting discrepancies; the team made the final decision. No customer adoption, revenue or independent business outcome was measured in this classroom exercise.
- In synthetic exercise 39, I checked 49 monthly records and prepared 41 traceable review notes for the fictional Harbor team. My responsibility was limited to checking the supplied records and documenting discrepancies; the team made the final decision. No customer adoption, revenue or independent business outcome was measured in this classroom exercise.
- In synthetic exercise 40, I checked 50 monthly records and prepared 42 traceable review notes for the fictional Harbor team. My responsibility was limited to checking the supplied records and documenting discrepancies; the team made the final decision. No customer adoption, revenue or independent business outcome was measured in this classroom exercise.

Certifications

- In synthetic exercise 41, I checked 51 monthly records and prepared 43 traceable review notes for the fictional Harbor team. My responsibility was limited to checking the supplied records and documenting discrepancies; the team made the final decision. No customer adoption, revenue or independent business outcome was measured in this classroom exercise.
- In synthetic exercise 42, I checked 52 monthly records and prepared 44 traceable review notes for the fictional Harbor team. My responsibility was limited to checking the supplied records and documenting discrepancies; the team made the final decision. No customer adoption, revenue or independent business outcome was measured in this classroom exercise.
- In synthetic exercise 43, I checked 53 monthly records and prepared 45 traceable review notes for the fictional Harbor team. My responsibility was limited to checking the supplied records and documenting discrepancies; the team made the final decision. No customer adoption, revenue or independent business outcome was measured in this classroom exercise.
- In synthetic exercise 44, I checked 54 monthly records and prepared 46 traceable review notes for the fictional Harbor team. My responsibility was limited to checking the supplied records and documenting discrepancies; the team made the final decision. No customer adoption, revenue or independent business outcome was measured in this classroom exercise.
- In synthetic exercise 45, I checked 55 monthly records and prepared 47 traceable review notes for the fictional Harbor team. My responsibility was limited to checking the supplied records and documenting discrepancies; the team made the final decision. No customer adoption, revenue or independent business outcome was measured in this classroom exercise.
- In synthetic exercise 46, I checked 56 monthly records and prepared 48 traceable review notes for the fictional Harbor team. My responsibility was limited to checking the supplied records and documenting

discrepancies; the team made the final decision. No customer adoption, revenue or independent business outcome was measured in this classroom exercise.

- In synthetic exercise 47, I checked 57 monthly records and prepared 49 traceable review notes for the fictional Harbor team. My responsibility was limited to checking the supplied records and documenting discrepancies; the team made the final decision. No customer adoption, revenue or independent business outcome was measured in this classroom exercise.
- In synthetic exercise 48, I checked 58 monthly records and prepared 50 traceable review notes for the fictional Harbor team. My responsibility was limited to checking the supplied records and documenting discrepancies; the team made the final decision. No customer adoption, revenue or independent business outcome was measured in this classroom exercise.
